

Sexual Orientation and Multiple Job Holding: Evidence from Swedish Administrative Data

Christopher S. Carpenter, Erwan Dujeancourt, Samuel Mann, and Lucia Naldi

Vanderbilt University
Stockholm University
Rand Corporation
Jönköping International Business School

August 29, 2024

Importance and Literature

- 1 Multiple job holding is a **widespread phenomenon**, 10% of workers are multiple job holders in the OECD (Tazhitdinova, 2022).
- 2 ↑ **precarious jobs** and ↑ **gig economy**, ↑ **MJH** (e.g. Katz and Krueger, 2019).
- 3 ↑ **MJH** ↑ **skill acquisition**, ↑ **human capital**, ↑ **career and occupation mobility**, but ↓ **work-life balance**, ↓ **sleep**, ↑ **injuries** (e.g. Marucci-Wellman et al, 2016; Panos et al 2014; Paxson and Sicherman, 1996).
- 4 63 countries criminalize LGBTQ (ILGA, 2024). Sexual minorities are more likely to experience **vulnerabilities** in the labor market (e.g. Badgett et al, 2023).
- 5 Sexual minorities are a sizeable and growing share of the population.

Sexual Minorities are a Sizeable and Growing Share of the Population

Americans' Self-Identification as Lesbian, Gay, Bisexual, Transgender or Something Other Than Heterosexual

Which of the following do you consider yourself to be? You can select as many as apply. Straight or heterosexual; Lesbian; Gay; Bisexual; Transgender

--Respondents who volunteer another identity (e.g., queer, same-gender-loving; pansexual) are recorded as "Other LGBT" by interviewers. These responses are included in the LGBT estimate.

--Data not collected in 2018 and 2019.

--2012-2013 wording: Do you, personally, identify as lesbian, gay, bisexual or transgender?

GALLUP

Sexual Minorities are a Sizeable and Growing Share of the Population

Trend in LGBT Identification by Generations of U.S. Adults, 2012, 2017 and 2021

--Generation Z are those born between 1997 and 2012. In 2017, only those born between 1997 and 1999 had reached adulthood. In 2021, only those born between 1997 and 2003 had reached adulthood.

--Millennials are those born between 1981 and 1996. In 2012, only those born between 1981 and 1994 had reached adulthood.

--Generation X are those born between 1965 and 1980.

--Baby Boomers are those born between 1946 and 1964.

--Traditionalists are those born before 1946.

Research Question

- 1 What are the differences in the **raw likelihood** of multiple job holding between sexual minority and heterosexual individuals?
- 2 What are the **drivers** of multiple job holding?

Research Question

- 1 What are the differences in the **raw likelihood** of multiple job holding between sexual minority and heterosexual individuals?
- 2 What are the **drivers** of multiple job holding?

Sources and Definitions

- Swedish business and population administrative data (18-65 years old).
- Sexual minorities and Heterosexuals:
 - Whoever entered in a legal same-sex union as likely **sexual minorities**
 - Whoever entered exclusively in a different-sex legal union as likely **heterosexuals** (e.g. Aldén et al., 2015; Andersson, Noack, Seierstad, and Weedon-Fekjær, 2006).
- **High quality** and does not require self-identification.
- Identifying and following sexual minority individuals **since 1995**.
- But, identification of sexual minority **singles** who are never observed to enter legal unions.
- But, identification of **bisexual individuals** (disproportionately likely to enter different-sex relationships) (Badgett, 2021).

For likelihood estimations, we use an LPM

Equation (1)

$$Y_{irt} = \alpha + \beta_1(\text{Ever in a Legal Same – Sex Union})_i + \gamma X_{irt} + \delta T_t + \varepsilon_{irt}$$

- Y_{irt} : Multiple job holding outcome (1 if the individual i has at least 2 employers simultaneously at year t).
- $\text{Ever in a Legal Same – Sex Union}_i$: dummy (1 if the individual i is ever observed to be in a legal same-sex union).
- X_{irt} : vector of individual demographic characteristics from the population register data (i.e. age, age squared, education levels, immigration background, childrearing, legal union dummy, already divorced dummy, and geographical controls).
- T_t : year dummies.
- ε_{irt} : error term is assumed to be iid.

Notes: Robust standards errors in parentheses. *** $p < 0.01$, ** $p < 0.05$, * $p < 0.1$. Author calculations from Sweden population register linked to Sweden business register. Education base: uncompleted secondary school education. Regional category base: Metropolitan.

Robustness checks

- 1 Macroeconomic uncertainties and cycles.
- 2 Wealth, financial wealth, real estate wealth, debts, student debts, bank accounts, and mortgages.
- 3 Mother and/or father lives in the municipality.
- 4 Siblings FE.
- 5 Different time frames.
- 6 Different age restrictions.
- 7 Different regional categories including municipality FE.
- 8 With and without childrearing. Age of the child.
- 9 Different partner situations and controls including partner employment status, log partner wages, and disposable income.
- 10 Different industry, occupation, and firm FE.
- 11 IQ and non-cognitive controls.
- 12 Different tolerance controls including regional panel opinion surveys.

Conclusion

- We show that sexual minority individuals are **more likely** to be multiple job holders than heterosexual individuals in the full population.
- Once we control for observable characteristics, sexual minority women and men are **12-29 percent more likely** to be multiple job holders than heterosexual women and men.
- Evidence for **self-insurance mechanisms** for sexual minority men and **career mobility mechanisms** for sexual minority women.
- Consistent with studies on multiple-job holding.

Conclusion

- We show that sexual minority individuals are **more likely** to be multiple job holders than heterosexual individuals in the full population.
- Once we control for observable characteristics, sexual minority women and men are **12-29 percent more likely** to be multiple job holders than heterosexual women and men.
- Evidence for **self-insurance mechanisms** for sexual minority men and **career mobility mechanisms** for sexual minority women.
- Consistent with studies on multiple-job holding.
